Define the Problem Statements

Metro Ticket Generating System in ServiceNow

Date	Team ID	Project Name	Maximum Marks
04 September 2026	_____	Metro Ticket Generating System in ServiceNow	2 Marks

The statements below translate the user needs visible in the project scope and implemented booking flow into customer-focused problem statements.

P S	I am (Customer)	I-m trying to	But	Because	Which makes me feel
PS-1	a metro passenger	book a ticket for a selected route, journey type and number of passengers	manual or unclear processes can make fare entry and ticket generation inconvenient	I need a single guided form that validates required information and calculates the fare automatically	frustrated when booking takes extra effort and uncertain when the payable amount is unclear.
PS-2	a metro passenger	receive convenient proof of my completed booking	a normal confirmation is less convenient for station-side verification	I need a digital ticket with a scannable QR code that can represent my booking	more confident and prepared when I can quickly present and verify my ticket.

Problem Statement Priority

PS-1 is the primary problem because the ticket-booking form is the core customer journey. PS-2 is a closely related problem that improves the usability and verification of the completed booking.
