- QR Code Scanner
- Script Include / Business Rule for validation
- Update Ticket Status

Goals & Motivations

- Easy and quick access to book metro ticket
- User-friendly portal experience

- Provide accurate journey information
- Choose preferences easily
- Clear form with smart guidance

- Ensure correct data entry
- Prevent errors with real-time validation
- Show correct fare transparently

- Process request reliably and securely
- Store data for future reference
- Keep user informed

- Provide secure, digital ticket
- Easy access to ticket anytime
- Reduce paper usage

- Fast and secure entry at stations
- Prevent ticket misuse
- Complete journey smoothly

Positive Moments

- Simple navigation
- Clear service offering
- Intuitive interface

- Smart field behavior
- Auto-suggestions for stations
- Smooth form experience

- Instant validation feedback
- Accurate fare shown
- Confidence in correct entry

- Quick processing
- Instant confirmation message
- Notifications received

- QR ticket generated instantly
- Easy to view & download
- Professional digital ticket

- Quick QR scan
- Instant verification
- Hassle-free entry

Negative Moments

- Portal slow to load
- Confusing navigation
- Catalog item not visible due to role restrictions

- Wrong station selected
- Mandatory fields missed
- Complex form for new users

- Validation errors
- Fare not calculated due to missing data
- Route not available

- Processing delays
- No confirmation received
- Notification not delivered (email issues)

- QR code not loading
- Ticket not found in "My Tickets"
- Ticket data incorrect

- QR scan failure
- Already used ticket
- Network issues during verification

Areas of Opportunity

- Optimize portal performance
- Better catalog visibility
- Personalization for users

- Add auto-complete for stations
- Save recent journeys
- Simplify form steps

- Enhance validation messages
- Show fare breakdown
- Suggest alternate routes

- Integrate Payment Gateway
- Add SMS/Email confirmations
- Improve error handling & retries

- Add wallet / pass integration
- Allow sharing ticket
- Offline ticket access (PDF / Wallet)

- Offline QR verification
- Real-time analytics
- Fraud detection & alerts

Security & Governance (Across All Stages)

Role-Based Access Control (ACL) • Data Integrity • Audit Logs • Secure Data Storage • Compliance with Platform Policies

Future Enhancements

Mobile App • Payment Gateway • SMS/Email Ticketing
Analytics Dashboard • Multi-Language Support
